

Dear FCC,

DOCKET FILE COPY ORIGINAL

What better use of my extra Christmas card than to ask you to please use any influence you have, during the process of allowing cellular use on planes, to guide airlines towards allowing data but not voice use in flight.

Thank you

"The ground all dusted white, frosted windows spilling light...
Everything says welcome home to Christmas."

Happy Holidays

Especially at Christmastime,
may your home be warm
with laughter, love, and joy.

Merry Christmas

Dear FTC:

I hope that if cellphones become legal to use on planes then voice calling will still be banned. I personally do not mind if cellphones are used for messages and internet use but voice calling by many people during a flight would be annoying to many people. Unfortunately, flying has now become bothersome and annoying because plane seats continue to get smaller and you must limit yourself to one small carry on bag and a personal item or get hit with extra fees. Also, on American Airlines seats that used to have no extra cost now cost extra. I hope that voice calling continues to be banned if not by the FCC then by DOT because it would be annoying to many passengers and flight attendants. Finally, I think it could lead to actual fights between passengers because people would be arguing about how loud someone is speaking on the phone. Somebody, could be trying to take a nap, want to read quietly, or quietly watch a movie, or surf the Net with the plane's wi-fi. Thanks for considering my opinion and have a great end of the year and happy new year.

Sincerely,

Dan Weiser

Dear Sirs:

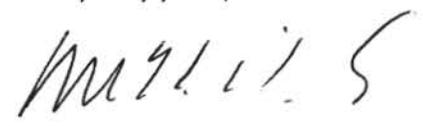

I am writing to register my strong opposition to permitting airline carriers to allow passengers to conduct cellphone conversations during flights. Allowing every passenger the right to jabber throughout a three hour flight would simply add to the hell that modern air travel has become. I have very little faith in allowing the airlines to exercise their good judgment in this matter, particularly if there is a dollar to be made in allowing passengers to use their cell phones.

When did common sense become passé? Forgetting the gross inconvenience to others, at some point this becomes a safety issue. Imagine being stuck in a middle seat with the passengers on either side of you using their cell phones throughout the flight: "Yeah . . . Oh, nothing . . . Yeah . . . Just took off . . . Yeah . . . I don't know . . . I can't remember her name . . . No . . . Maybe it started with an 'S' or something . . . No, that's not it . . . No . . . [Loud laughter] . . ." Three hours of this on both sides of you.

I have no objection to passengers using their mobile wireless devices on flights for other purposes, so long as they do not annoy other passengers by doing so.

Thank you for your consideration.

Very truly yours,

mk

To Whom It May Concern:

I strongly urge you to vote NO when considering the use of cell phones on airplanes. An airplane flight is one of the very few sanctums left in our society. Do not take this away. Thank you.

Dear Sir,

I am writing to express my **TOTAL** opposition to permitting the use of cell phones in aircraft beyond the present rules. In theory – in an ideal world – all of us would like to have the choice and freedom to use phones on aircraft as we do everyday for personal and business etc. But the issue of regulation when usage is unwarranted and intrusive looms large and seems quite unworkable. Short of having flight attendants who are already busy and overworked, how would one deal with folks – like myself – who have voices which are loud and project? I wouldn't want to come to me and ask me to lower my voice etc. Or worse, when a customer has had a few drinks and is loud on the phone and in the seat next to me?

I don't know how the Europeans make it work, but it's just not workable in the US, and especially in confined spaces like a plane at 30,000 feet.

So – for the reasons presented above – NO PHONE USAGE until just before takeoff and until landing.

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'Peter J. McKimmin'. The signature is fluid and cursive, with a long, sweeping underline that extends to the right.
